

# Ownership Statement

Founded in 1981 by a large group of local community physicians, BRASS Surgery Center was the first multi-specialty outpatient surgery center in Baton Rouge and has proudly served the greater Baton Rouge area continuously since that time. With a general partner providing overall management and staffing services of the facility, our physician partners are actively involved and serve in key advisory and governance positions to guarantee delivery of top quality, highly efficient, cost effective care to the patients we are privileged to serve. Our surgeons and medical practices who have partnered with us in this mission include the following:

## Surgical Care Affiliates-General Partner
